Revised Date: MARCH 2020

Description

HOLDIT AUSTRALIA G58 Flexible Gasket Maker is a single component, medium strength, Thixotropic, anaerobic sealant which cures when confined between close fitting metal surfaces. G58 Flexible Maker provides an instant low pressure seal.

Applications

G58 seals joints between rigid metal faces and flanges such as valve covers and gearbox castings. This product can be used with or without pre-cut, pre-formed gaskets.

Instructions for Use

1. For best results clean all surfaces with a cleaning solvent and allow to dry.
2. If the metal is inactive or the cure speed is too slow apply HOLDIT AUSTRALIA AA471 Activator or HOLDIT AUSTRALIA AA649 Accelerator. Please see table below for information on Active and Inactive metals.
3. Before application shake the product thoroughly.
4. Apply the adhesive to the fixing position of the fastener or onto the internal threads of a blind hole.
5. Assemble components, and tighten to require torque level.
6. Allow to fully cure before applying load.

Compatible Primers

Primer such as AA649 Accelerator and AA471 Activator can be used to speed the fixture time of the adhesive. Fixtures times can improve by as much as 50%. The use of primers can result in lower strength and performance and should be tested after full cure.

Storage

HOLDIT AUSTRALIA G58 should be stored in a dry cool area, out of direct sunlight in temperatures between -10°C and 30°C. Optimal Storage temperature is 22±4°C.

This product has a 24 month shelf life from manufacture when stored at 22±4°C.

Presentation

HOLDIT AUSTRALIA G58 is available in 50ml and 250ml Tubes.

Note

Where gap size is large or where the surface is uneven, apply a HOLDIT AUSTRALIA Primer to assist curing the product. G58 Flexible Gasket can be roller coated, screen printed or pad applied.
